- Tracking and communicating students' advancement throughout the course
- Invigilating and grading projects, quizzes, and examinations

PROJECTS

e-commerce platform to facilitate online retail shop
Stencyltech

Technologies: Python, Django, Postgresql,GitHub, AWS EC2

- <u>Developed </u>a comprehensive e-commerce platform to facilitate online retail shopping.
- <u>Implemented</u> backend services using Django and Django REST Framework to manage product listings, user authentication, order processing, and payment integrations.
- <u>Designed</u> a user-friendly front-end interface with React.js, featuring advanced search, filtering, and cart functionalities for a seamless shopping experience.
- <u>integrated </u>secure payment gateways (e.g., Stripe, PayPal) and implemented order tracking, allowing users to monitor their purchases.
- <u>Utilized</u> GitHub for version control and team collaboration, managing code changes and coordinating development efforts.

Tonocast Comic Web
Rayloop Private Limited

Technologies: Python, Django, Django REST Framework (DRF), React.js, GitHub, AWS EC2

- <u>Developed</u> a dynamic web application that allows users to read comic stories online.
- <u>Implemented</u> backend services using Django and Django REST Framework to handle user authentication, comic story uploads, and retrieval.
- <u>Designed</u> an intuitive front-end interface with React.js, ensuring a seamless user experience
- <u>Deployed</u> the application on AWS EC2 for reliable and scalable performance.
- <u>Managed</u> version control and collaboration using GitHub.
